- Requirements Engineering
- Managing and Mentoring

Overview

I'm a lead engineer with several years experience delivering products and managing teams. I have a hunger for growth and I'm always ready for a new challenge.

Experience

Lead UX Engineer, *AppThis, 2016 - present*
- Designed and developed robust applications using React and other modern technologies
- Served as both an individual contributor and manager of full-time and off-shore engineers
- Acted as engineering lead and digital design lead across the entire suite of web applications
- Met with stakeholders across the business to build and design new products and features
- Contributed to engineering vision and leadership

Front-end Development Lead, *Dynamit, 2015 - 2016*
- Served as both a manager and individual contributor
- Oversaw work on nearly every client in the portfolio
- Managed staffing assignments
- Built a culture of code review and accountability
- Lead development on several projects, large and small
- Created tools to increase developer efficiency
- Contributed to new policy definition and roll-out

Senior Software Engineer, *Dynamit 2015*
- Lead initial development on large-scale websites
- Maintained long-tail retainer projects
- Introduced new ideas for front-end to back-end hand-offs
- Authored blog content for dynamit.com
- Helped re-boot the company's open-source initiatives

Senior Developer, *Resource/Ammirati, 2012 - 2014*
- Built and maintained websites for Fortune 500 companies
- Functioned as subject matter expert on several topics
- Authored front-end development standards
- Interfaced with clients on a regular basis

Education

Cedarville University, *2011*
Integrated Social Studies Education
